About This Content

The Unlock Offline pack does exactly what it says on the tin, by giving you the opportunity to unlock hours of gameplay with the Offline portion of the game, which includes:

- **A full Career mode, with 3 game types; Snooker, 8 Ball and 9 Ball. You can customise your rules, amend your AI difficulty levels and more.**
- Endurance, a fast paced race against the clock mode, where balls rain from above times up once 24 balls are on the table.
- Artistic pool Trickshot sandbox where you can raise, lower and rotate a variety of objects to create epic trickshots
- Versus local multiplayer, here you can play against your mates or work your way through the AI
- Trickshot Daily Challenges
- Up to 11 different game types

[/b]

*Download this game play it without making in-game purchases. Optional in-game purchases are available that may enhance

your gameplay experience but are not necessary to complete the game, DLC has been created to save time in downloading all unlockable assets in game for those who wish to do so.

Title: Pool Nation FX - Unlock Offline
Genre: Casual, Indie, Massively Multiplayer, Simulation, Sports, Strategy
Developer:
Cherry Pop Games
Release Date: 7 Dec, 2015

a09c17d780

English,French,Italian,German

Capsule: Lovely Tower Defense + top-down shooter + god-sized involvement.

I, too, would like to be able to manipulate my little avater a little more easily - falling off the table is a heck of a penalty - but that is a quibble.

For the price I can recommend it to anyone who is looking for more toy-table style VR games. I note that this game *IS* in first-person - just that as that person you are controlling elements on the playfield that move separately from you. Unlike, say, Legend of Dungeon (which I also very much like), you are directly interacting with the playfield in your 'character' even as you drive your on-field avatar with the touchpad.

Other reviewers disliked these things. I found the innovative and a delight to play with.. Saw a link on reddit.

Was worth it.

. I was hesitant to get this at first because of fear that I wouldn't be able to play it. But, yeah, my pc (with Windows 10 64-bit) can run Crysis, as well as the others in the Crysis Collection. It's one of the benchmarks of FPS games, along with other games from that fantastic year for FPSs, 2007. It's 10 years old but it still surpasses many of the FPS games released in recent years, in terms of graphics, open-world fun, and mechanics, particularly with the nanosuit. I'm just hoping I won't hit a snag, just like what others are experiencing, when I get to that final boss. Highly recommended especially for those who love playing a classic.. Very decent DLC with loads of content. This game is has reinvigorated platformers for me!. Wow this is beyond basic as far as the early access games out there. The map is tiny. You can't stealth anywhere because the only form of locomotion is teleportation. The soldiers hitboxes make no sense. Parrying feels ok but handling swords are buggy overall. They seem to lag and and clip on random things. You should have only one grip/release button having both makes dropping your weapon mid swing entirely more likely. Even for 8 dollars i feel right now there isnt even that amount of gameplay.

I will keep my eyes on it as it develops but this is not what i expected seeing the trailer and images i thought the map was bigger and stealth played a bigger factor. You can't even distract enemies with bottles.. I really like the combat of this expansion, but it was so short, it took me 2 hours to complete which is really dissapointing. I purchased this for the classic "brick-breaker" type gameplay, but I fell DEEPLY in love with the game's music, which is some of the best music I've ever heard in a video game in years. The powerup's are well-balanced and there's plenty to do after completing the story mode.. Villagers falls into what feels like a resurgence in genre currently, the city builder. It does so well at doing what it does best, it looks pretty darn good, plays really well and I've yet to come across any bugs bar the one I mention in the video. It has alot of gameplay to sink into and alot of challenges to try and attempt to get past, hope you're ready for spending the wee hours playing!

Check out my first impressions here - <https://www.youtube.com/watch?v=3cGkdegojmU>. This is a super early review but I know how much that can matter in the success or failure of games on Steam, VR games especially and it'd be a shame to see this game go no-where due to lack of reviewers. In short if you're after Mario Kart on Vive then for the price I'm certainly not arguing, nausea might hit you a bit hard to start with but if you can handle Cars and other more 'intense' experiances then it shouldn't be a problem. Not seen a huge amount of the content yet but what I have looks nice and well made. It's cheap and it's karting in vr, on that basis I'd say it's on to a winner. Will update in case my experiance changes dramatically from more play time.

Excellent! Very addictive. It's more similar to Crystal Nebula minus the maze.

Initially after seeing the video, I was not too impressed. But the gameplay is much better than I thought. The enemies wave are different each time. They are randomly generated. One feature I like the most is that you can regain your health by picking up powerups.

It was confusing at first how the level and powerup works. I died often without knowing how I got shot. It is quite addictive. I just bought the game today and I played almost 2 hrs. Actually I am going back in very soon.

. I downloaded this game to play multiplayer with some friends witch we could not manage to do. The implementation of hostingVjoining games is realy bad needs some serious changeVupdate. As singleplayer the game is quite simple and not very fun.. So far so good!. Worth every cent you get out of it. This powerhouse of a ship may be just Tier V, but works like a Tier VI or VII. Deliver nasty hits to the enemy, however, you may over penetrate some ships.

Snag this on sale, it's worth your time, and that camo will spice up the battlefield too.. I rarely leave a review but felt this game deserving of one. I collect games and usually just take them out for a quick test drive with the intention of getting back to them if one appears to have potential. Of the three games I bought today Trapped Dead: Lockdown was the one I held out the least amount of hope for. Much to my surprise this little game was a blast and I was blown away by it enough to go back in my libraray and break out the original Trapped Dead and start it up to. Trust me this will be \$9.99 that is well spent.. I bought this game at 88% discount and... I want my 59 cents back. The translation is awful. And I mean AWFUL. It's not just some gramatical mistakes, I don't even understand what characters did say sometimes. In current state this game is unreadable. If you are reading this just... don't buy it. Don't waste your money.. its so much micromanagement that it doent let me enjoy the actual game. god, even the tutorial is a hell of a lot of work. not my cup of tea, unfortunately.
